Helping the Minister.

"One thing helped me very much while I was preaching to-day," said a clergyman. "What was that?" inquired a friend. "It was the attention of a little girl, who kept her eyes fixed on me and seemed to try to understand every word I said. She was a great help to me." Think of that, my little ones, and when you go to church or chapel, fix your eyes on the minister and try to understand what he says, for he is speaking to you as well as grown-up people. He is telling about the Lord Jesus, who loves the

The Vallejo Chronicle of March 4th says: "The allowance for the yards and docks for the present month approximate \$2,000 less than for the month of February. Yesterday thirty-three men were discharged from Denio's gang. No more discharges, however, will be made this month, but all the men in the department will be all the men in the department will be put on half-time, to bring the expenditure within the allowance.

The Marysville Appeal hears many endorsements of the proposed Hedges canal, by which a portion of the waters of the Yuba river, in flood times, might be carried Southward and emptied into the Feather river. Many think the proposed canal a practical and important undertaking, and one almost indispensable for the safeone almost indispensable for the safety of the city.

Articles of incorporation have been filed with the County Clerk of Inyo by the Bishop Creek Grange, for the purpose of building a hall, storehouse and the carrying on of a general mer chandise business. CITY AND COUNTY OFFICIAL PAPER. TUESDAY,..... MARCH 9, 1875.

Oakland, the stronghold of the Republicans, throws off on the party. At Republican candidate, on whom the fight was made, was defeated.

A LITTLE bit of sharp practice has been played on juvenile innocence at the Mare Island Navy Yard. All the apprentices have been discharged in order that the funds may be made to two members on the committees of last for the workmen.

NEW HAMPSHIRE will hold her last session, with the exception of State election to-day. There are three those heretofore filled by out-going NEW HAMPSHIRE will hold her parties in the field, but the contest is between the Democrats and Republicans, both of whom express confidence in winning the fight. The chances are, however, in favor of the Demo-

On the fourth page of this morning's HERALD we print the annual address of the Master before the National Grange. It is a temperate, suggestive, and able paper, and one which all may read with satisfaction, and from which all who do read it will obtain food for thought and reflection. Those who have heretofore held the Grange to be a wild impractical scheme for securing the farmer fair prices for his products and an even chance in competitive trade, will, after reading the Master's masterly address, conclude that they who have errors to correct. have the intelligence and courage to correct them. It will be noticed that while the address points out evils and suggests remedies, it is reasonable in its demands, and urges nothing nor asks for nothing but simple justiceright between man and man.

THE following names appear on the list as subscribers to the stock of the Los Angeles and Independence Railroad: S. R. HOLMAN, W. M. McFAD-DEN, TH. REISER, WM. KONIG, H. KROEGER, A. LANGENBERGER, GEO. C. KNOX, M. NEBELUNG, SIMON GOLSTEIN, F. E. MEDEN, LAFOUCHE-RIE & HILL, A. BITNER, M. F. MATZ, TIMM BOEGE, THOS. B. JOHNSON, W. J. SMITH, ALFRED METCALF, DANIEL | bor is piled full of ice and the river KRAEMER, J. JORDAN, LOUIS DURR, is frozen to an unusual depth. Great J. S. GARCIA. The amount subscribed aggregated \$6,000. The committee did net have time to solicit further subscriptions yesterday, but they are confident that \$12,000 will be subscribed by the Anaheim people, and they heard of others still farther down the valley who are anxious to take stock. The committee will return and visit all that portion of the county soon. Well done for Anaheim.

The Item of Lumber.

Take the single item of lumber and pon it count what we shall gain by the railroad now in course of construction between this city and Truxton. Now it costs seven dollars per thousand feet to move lumber from the schooners in Wilmington harbor and lay it down in Los Angeles. The railroad company claim that they cannot deliver it here at a less cost than they are now charging. We do not assume to contradict this. We take it that the company understand their business, and when they say they can or cannot do a thing we concede the point without argument. Granted that the railroad company cannot bring lumber from the anchorage up here for less than seven dollars per thousand feet, it follows that we must pay that rate or get our freighting done by other parties and from some other point. Los Angeles is preparing to adopt the latter alternative. Good lumber is now worth thirty-five dollars per thousand in this city. The dealers cannot sell it for less while freight enemies to punish, or friends to recharges remain at their present figures. But lumber can and will be sold here at twenty-five dollars per thousand, and that too within less than one year from this date. The Los Angeles and Independence Railroad Company have contracted for all the first-class lumber they want delivered at Truxton at twenty dollars per thousand, and when the road is completed the charges to this city will be less than five dellars per thousand from the wharf. Any one can count up the gain on the item of lumber.

Alive to Their Interests.

The prediction made in Sunday morning's HERALD that the people of the lower portion of the county fully understood the advantages they would secure by the building of the Los Angeles and Independence Railroad, was fully verified at the meeting held in Anaheim on Saturday evening. There were a few-only two made themselves conspicuous-of the kind of men who oppose the building of all roads except such as run three times around their | Cod. house, directly through their pig pen and down by their back kitchen. But the meeting was made up chiefly of sensible and practicable men, who fully realize the importance of connecting the valley with the mines by railroad. They were of that class of men who do not need to be told that this railroad will benefit the whole valley by securing a certain market for Prussian Chamber of Deputies a bill not only the surplus products of to-day but for the hundred fold increase that we may count on in the near future. Withdrawing State endowments from Catholic clergy and providing for their restoration only to those of the Bishops who will bind them themselves by for-They are fully aware that this market mal documents to obey the Governinfluence will be felt all over the val- | ment.

All parties except the short time. Being fully aware of all this, they are placing their names on the subscription list, and already they her city election, a few days ago, the have subscribed for a considerable amount of stock.

Col. B. L. Peel, who is canvassing Anaheim for subscriptions to the stock of the Los Angeles and Inde-pendence Railroad, came home yes-terday afternoon, but will return to the charge to-day.

To-day or to-morrow Jones & Bland will have on sale at their auction house fine collection of miscellaneous books from the largest book house in San Francisco, which will be sold at auction or private sale.

There will be an interesting race at Agricultural Park to-morrow for a purse of \$50; first \$30 and second \$20. The horses entered are Welch's Pauline, Askin's Rubber Boy and Campbell's Maid. The race will be mile heats, three in five, to harness and rule. It is complimentary to Mr. Budd Doble and wife, who will be present. Admission 50 cents; ladies free.

A force of ninety Chinamen, forty white men and thirty teams is engaged at Truxton grading for the railroad. Some deep cuts are required near the coast. Although the work has been vigorously prosecuted for about two weeks, not more than half a mile of the road has been graded. As soon as the bluffs are passed, how-

ever, the progress will be very rapid. As a general thing, large cigars are made up of poor tobacco and indifferent cabbage leaves. But we have found an exception to an almost universal rule. It is a large cigar to be found at the cigar store of I. Cohn, No. 61 Main street. They are a large amount of a first-class article. They retail at three bits each, and to the lovers of pure tobacco one of them is worth six of the ordinary bit cigars.

At a meeting of the Directors of the Agricultural Association held last Saturday, a resolution was adopted, providing for the appointment, at the next meeting, of a Presiding Judge and two associates, to rule at all race points at the coming fair. The associate judges are to be chosen from the association and the Presiding Judge from the outside, the last named functionary receiving \$100 as compensation for his services.

Our friend Dingman, of the Tele graph Variety Store, has just received the most complete thing in the way of a pocket knife we have seen. It is a small, elegantly finished pearl handle multum in parvo. It has two blades, a pair of scizzors, a tooth-pick, a file and another arrangement much needed by people whose sense of hearing is a little defective. All these things are of the finest steel and are so compactly arranged that they make up only a very small and very pretty pocket knife. If you would have a set of the finest tools, call at Dingman's and get one of those knives.

The new Babcock hook and ladder truck, purchased by the city, arrived yesterday and will be set up and formally delivered to-day by Capt. Borrowe. The whole affair, known as "style No. 2," comprises, besides the truck, the following apparatus: 6 Babcock Fire Extinguishers; 18 sets chemical charges; 2 ladders, 18 and 22 feet, with splicing braces, extended 38 feet; 2 ladders 14 and 16 feet feet, with splicing braces extended 20 feet; 1 scaling ladder, 12 fire buckets, 4 axes, 4 pike poles, 1 large hook and chain with pole and rope,4 lanterns, 1 signal Clerk of Com. With pole and rope, 4 lanterns, 1 signal lamp, 70 feet drag rope on reel. The entire cost to the city for the truck and attachments is \$850. Of this \$350 is covered by the sale of the old truck, which was considered practically worthless for use in our city. Upon the whole, we think the Babcock will prove a profitable investment.

Major Ganahl being called upon, responded with a telling speech, in which he pre-sented the subject in all its phases and proved to all present that it was the most profitable investment ever offered to any people. He had visited the mines, and spoke whereof he knew. The road would be unable to carry the immense amount of ore that would afford, the increase in the value property, and the immigration is would encourage. Every man should feel it a privilege to take this stock. It was one of his happiest efforts. A man named Davis was called out by some of the boys present. He assailed the charge of it in the most vindictive manner, and vented his spleen against

LOS ANGELES Generally. Some said that he was sent there from Los Angeles to distusb the harmony of the meeting-we hope not, for the credit of Los Angeles. After Davis was through, Col. Peel arose and repelled the attack of Davis in a logical and dignified manner. Mr. Wiseman then arose and spoke in a very abusive manner of Los Angeles. This so disgusted the audience that several of them left. Gen. How-ard was loudly called for and made one of the most timely and interesting speeches we have ever listened toone that everybody was delighted with, and, we have no doubt, induced a great many present to take stock in the road. Mr. Lord volunteered to respond to some of the remarks of those

that had spoken so unfavorably of THE ENTERPRISE. After the speaking was over, a committee of three was appointed to solicit subscription to the stock. About \$1,900 was voluntarily taken before the committee solicited any. After the meeeting was over, several of the citizens expressed themselves very in-dignant at the conduct of Davis and Wiseman, they said that Anaheim was not responsible for their conduct. A good share of the stock will probably be taken by the citizent of Ana-

Was next called upon. He stated that he was not opposed to the road, but that it seemed to him that "they had run the road as far from us as possible, in three years this valley would save as known, beside several hundred other structures, I vent ired to estimate the cost of days it would take to do the work, allowing four dollars per day, including the excavation and cost of hading the material. The aggregate of these several sums was the amount for which I proposed to erect the building—that is, the full and exact cost of the material delivered on the ground, and the labor to put the same into the finished structure. Yet I was told by the lumber dealer that he would not advance lumber or act as bondsman, because "they say you're a damned old fool, and don't understand your business." Now. ARTESIA.

SECOND SALE

2,000 ACRES

Tuesday. Wednesday and

Thursday,

April 6th, 7th and 8th, 1875,

The Directors of the Los Angeles Immigration and Land Co-operative Association would announce that at their late sales over 1,690 acres of land was sold; the greater part of win h went to actual settlers who will improve the same at once.

Desirous of disposing of the remaining lands—nearly 2,000 acres—in order to make the settlement as strong as possible, and at the same time give the Association an opportunity to subdivide other ranches, the managers now offer at Public Auction, the remaining lands, on the 6th, 7th and 8th of April, 1875, when the purchaser will be allowed to take the lands in parcels to suit

At their own Figures. The entire tract will be sold without reserve.

A Public School building, to cost over \$4,000 is now being erected and will be completed before the second sale. The percentage of the last sale devoted to the erection of this building amounted to over \$2,000, and the same percentage (10 per cent. on fown property and 2% per cent. on farm property) will be given for the same purpose from the proceeds of the next sale. Or Twent-five per cent. off for Cash. next sale.

Soil.

The soil is of a rich sandy toam and fre from alkali. There are two or three small pleces of alkali ground on the tract, but they will be pointed out to purchasers so that they may know what they are buying. The character of the soil is more like the warm mesa ands of the country, than the low, damp corn

Semi-Tropical Fruits

Will there find a combination of soil, climate and water well adapted to their rapid growth. These lands are not entirely free from frosts, but the cold is not severe enough to injure the growth of semi-tropical fruit trees, and rarely does any damage, except to the most tender vegetation.

Water.

The great desideratum of Southern California, without which the richest land is converted into a desert, and with it the desert is converted into a garden, is here easily obtained in great abundance. Furface water is found at a depth of ten or fifteen feet, and

Flowing Artesian Wells Can be readily and SURELY obtained at a depth of from one hundred and thirty to two hundred feet. There are many flowing wells in the immediate vicinity, and within the artesian belt no failure to get flowing water has ever occurred. Responsible parties propose to sink artesian wells everywhere on the tract and guarantee water or make no charge therefor. The town of

CITY AND COUNTY OFFICIAL PAPER.

TUESDAY ...

THE GRANGERS.

Annual Address of the Master of Patrons of Husbandry of the United

[From the Charleston News.] Patrons of Husbandry:

dales, the golden shore and prairie land, we meet together by the historic palmetto. Not as nomads, who gather at a shrine in obedience to sentiment, do we come, but as chosen representatives of the fraternity whose object is the moral and material advancement | that transportation of heavy commodof the greatest industrial interests of lities is at least an expensive luxury, the Great Republic. Standing as we and our true policy is to bring prodo to-day upon the narrow line which | ducer and consumer nearer together, divides the past from the future, about and so the less transporting. We, of to step forward into that time which | the South and West especially, should is all unseen by human eye, it behooves us to well scrutinize the track behind us, that we may gain thereby some clew to the path before us. One year ago we met beyond the Father of Waters, and congratulated ourselves on the growth and strength of our gigantic young Order. To-day, by the ever-sounding sea, we proudly pro-claim that our members have in-creased one hundred fold. Two more sister States have joined our ranks (Maine and Montana) have joined our ranks, and the few remaining ones are joyfully on the way. The work has spread from ocean to ocean. The winds have wafted the sounds across, and now they come back like echoes from the other shore, asking us to ex-tend to other people a helping hand. This uprising and organizing of a great and scattered interest has not a parallel in the history of the world. The magnitude and force of the movement has snrprised its friends and astonished and armed its foes. It has burst upon us with the suddenness of the erratic comet, yet promises to remain with the brilliancy and permanency of the sun. It found the agriculture of the nation unorganized, isolated, unrecognized, weak, plodding, and their voices virtually unheard in the councils of the land. Today they are organized, united, strong, thoughtful and duly respected and recognized as one of the great powers that be. Though much has now been done in awakening thought and clearing the field, yet we have but just stepped upon the mount and caught a

GLIMPSE OF THE PROMISED LAND. Right before us it lies, awaiting our possession. But ere we fairly reach | evade the clutches of the rich. the goal and fully possess the land we see, a wide, a weary waste is to be educational institutions of the nation, have long been in the hands of members of other callings. The monopoly will not be given up without a strug-gle; and whoever enlists in the Patrons of Husbandry in the expectation of an easy victory, reckons without his host. Our movement has been and will be met by a most determined and persistent warfare-every means which talent, wealth and place can command will be used. So, while we believe in the goodness of God and the justice of our cause, we must maintain unbroken ranks and keep our powder dry. In many of the States the work of organizing Granges has been nearly completed, and the noise and enthusiasm attending it is succeeded by comparative silence. The Order is there passing through the ordeal which shall reveal its weakness or display its strength. Though enthusiasm and noise were very suitable and efficient means to kindle the flame, they are not the material with which to maintain a steady and last-ing heat. To preserve the vantage ground we have gained and insure permanence and further advancement we must be able to show to our members and the world that material and moral gain does and will result from the civilized world. For we may gain our organization.

WE MUST KEEP OUR RANKS FULL, Our faith strong, our work pure and our actions wise. One year age I called the attention of this body to the them by devising profitable and agreeable plans of works and recreation, to that the present membership and interest would be not only maintained but increased. Owing to a press of business, no action has been taken in this matter, and the subordinate Granges have been thrown on their own resources. I am happy to announce that most of them have been equal to the emergency, but many of the weaker have languished and failed simply for the want of a little-paternal aid and counsel in their infancy. We cannot afford to thus allow the weak, for whom especially we should provide, to fall by the wayside. It is our stern duty, and should be an unmixed pleasure, to tend, direct, and uphold them.
If we fail in this, we fail in carrying out one of our most cardinal principle. Let me then most earnestly request you to give this subject your attention as one of the most important which ever came before you. It would be impossible, even were it desirable, in a paper like this to discern all the grave subjects which will demand your attention, but there are some which I cannot pass without a brief notice. Prominent among these is the subject of transportation, in which a producer or consumer. There is a deep-seated and well-founded conviction that the present modes of carrying commodities are uselessly expen-

RAILROADS AND CANALS, The only Spanish Newspaper In the expectation that increased facilities would result in the cheaper rates of transportation. We relied implicitly on the idea that by building plicitly on the idea that by building | Secretary, is each year assuming a numerous routes we would attain the more systematic and perfect shape fair rates; but sad experience has fully proven that increase in number and strength of transportation companies to state that the revenues of the Nagigantic combinations. Though we expenditures, thus leaving a balance have some powerful lines between the in the treasury, as will appear by the

bound freights have been advanced. To remedy this alarming and growing pacity, are powerless, and only through their united action as sovereigns can they obtain redress. In some of the States something of this has been done, but it has been necessarily fragmentary and wholly inoperative on through freights. It is utterly im-practical for the several States to act in concert through the different Legislatures. I see, then, no solution of this question for the people of the several States, though their Representatives to the General Government, to stretch ple and those corporations. I know I speak the sentiments of the people when I say we would do no wrong to From the snow-clad hills, the flowery the capital nominally invested in rail-roads. We fully recognize their ca-pacity for good, and all their just claims, but we demand justice and

PROTECTION FOR THE PEOPLE. But even if railroads do carry at fair rates, still the fact stares us in the face spare no pains to introduce and foster manufactures in our midst, that we be not obliged to transport our raw material and the manufactured article in. We of the East, where manufactories are many and strong, should, with equal assiduity, promote the cultivation of the raw material, that the terrible strain of transportation be lessened. I have long ago said that the history of the world or its present condition does not afford a single exam-ple of a country which has remained permanently prosperous by the production and exportation of the raw material, but their tendency is all the time toward a tendency of despondence and poverty. This position has not been disputed, and, I believe, can-not be. How important, then, that we cultivate the most amicable relations between all the productive industries as only by mutual development can be mutually prosperous, and the whole body politic to be maintain-ed in vigorous health. A thousand years ago, learned and thoughtful chemists devoted the energies of a lifetime to a vain search for the wonderful philosopher's stone, whose magic touch should convert the baser metals into purest gold, and thus fill the whole world at once with the wealth and luxury. To-day we have numer-ous citizens who are eagerly

PURSUING THE SAME PHANTOM. They are torturing their poor brains to devise some plan whose talismanic power will transmute bits of printed paper into countless millions of actual money of such a suitable nature that, true as the needle to the pole, it shall go straight to the pockets of the poor, and, like a "Will o' the Wisp," forever

It is an indisputable fact that our country is now seriously suffering from a derangement of finances. We need crossed, which will tax to the utmost | not be at a loss to know the cause. It our prudence, our perseverance and is a solemn reality that our country our valor. The positions of honor and has passed through a most wasting trust, the avenues to great wealth, the molding of the political, financial and lost, industry disturbed, material delost, industry disturbed, material destroyed, production stopped, more than \$10,000,000,000. This immense sum was in four years subtracted from the wealth of the country. It was consumed and forever gone. It made us comparatively poor. To bridge over the emergency of the hour, the Government issued great volumes of irredeemable paper currency, which we used as money, and thus for a time disguised and hid our poverty. By using this currency our judgment of valuables became more and more confused as we drifted further and further from the world's standard. We totally failed to realize our changed circumstances and to inaugurate a corresponding system of economy and industry, and consequently, with an inheritance of debt, extravagant habits and distorted judgment of values, we have been incessantly drifting to leeward. Out of the trouble there is no royal road. Only by a return to habits of industry and economy, guided by intelligence, can we regain our wealth and remove our load of debt. As an auxiliary to this we want

A STABLE AND SOUND CURRENCY That shall be a reliable measure of values, and recognized as such by all this truth from others and our own history: that an irredeemable, fluctuating currency always favors speculators and sharpers at the expense of those engaged in productive industry. fact that the subordinate Granges are the formative state, it has not seemed In an Order like ours, which is still in the foundation and life of our Order, strange that many cases have pre-and urged the necessity of aiding sented themselves during the last year which were provided for by no written law. To meet these emergencies, it has devolved upon me as the chief executive of the Order, to make numerous rules for our temporary guidance. These have been placed in the hands of your committee for arrangement, and will be submitted for your consideration. Some cases having arisen involving points of such doubtful expediency that I have hesitated to take the responsibility of making rulings. To cover this, additional legislation will be needed. An amendment to the Constitution has been adopted and ratified, providing for county Granges under the direction of State Granges. I am fully convinced from visiting several States that the widest possible difference will exist in the organization and management of these Granges in the different States. Under proper and efficient rules they cannot fail to be of eminent value to the Order, but if loosely and carelessly constructed they will be a source of endless anneyance and confusion. As the Masters of all the State Granges are here together in council, it might be well for this body to carefully pre-
